Description

Construction of a nutrient reduction wetland in Grundy County.

In general, the work involves, but is not limited to, selective clearing, excavation, grading, aluminum toe-wall installation, tile installation, CMP water control structure, and seeding. This project includes around 5,844 cubic yards of earthwork, one aluminum toe-wall, 915 linear feet of tile installation, 251 tons of riprap or erosion stone, and 2.5 acres of seeding. The estimated construction cost range for this project is $150,000 to $180,000.

Prospective bidders MUST submit a request to be added to the Plan Holders List by following the instructions in the Notice to Bidder. Pre-bid minutes and addenda will only be sent to plan holders.
