

Addendum 1 for RFI #931800-01

Project Name: Fire Training Center for the Iowa Department of Public Safety Fire Marshal Division

DAS RFI #: 931800-01

DAS Project #: 9318.00

Date: 01/20/2023

Addendum 1:

- Cover Page – Questions & Answers (1 Page)

1 QUESTIONS & ANSWERS

1.1 Will the facility be Class A or Class B?

1.1.1 Class A utilizing wood burning or similar products.

1.2 This solicitation for information reads as though you are looking for information for "an assembled" training center, leading one to believe you are looking for pre-fabricated structures such as containerized structures or pre-engineered metal buildings. Is that right? We work solely on concrete fire training structures which are protected with our refractory tiles and insulation (you refer to the material as ceramic).

1.2.1 The State of Iowa is open to alternative materials and methods for construction. The intent of the RFI is to determine what options are available, range of cost, and if the assembly would be designed by the manufacturer or require a third-party design procured by the State of Iowa.
