To: All Potential Respondents
From: Michael Bradbury, Statewide Procurement Officer
Subject: 005-RFB-2202-2026

Addendum One

Questions:

Question 1: After looking over the bid, it does not provide exact physical locations within the facility where the compactors are to be placed. Do you have any details?

Answer 1: Please see Exhibit A included with this addendum, which shows dumpster locations.

Question 2: Are you able to provide photos of the current compactors/set-up?

Answer 2: Please see Exhibit A for photos of the current configurations.

Question 3: If the compactors are inside, do you have any idea on the average security check times?

Answer 3: It is difficult to pin a time on this. It depends on what vehicles are in line to deliver inside, arrival of incoming offenders, and time of day.

Question 4: Do the containers need to have locks?

Answer 4: Everything must be lockable. The facility will provide padlocks and keys. Officers unlock them as they leave to dump them.

Exhibit A

At the main prison- medium site- there is one compactor and one can recycling container inside the secured fence (delays are possible). Currently there is one container outside of the fence. The areas where they go are circled in Red- however the snip below is not representative of quantities.

At CRC- the minimum site there is only one compactor container outside the fence.
