

Appendix E: Total Cost Proposal Form

INSTRUCTIONS:

Scoring Component 1: (150 Possible Points out of 200 Total Points)

The Bidder will complete the information requested for Table 1 as designated on the tabs within this workbook. This Tab will be used to generate the calculations used for scoring criteria as described in Section 9.3 using Table 1 Cell C8.

Note 1: Table 2 and Table 3 will not be included in generating the total cost for scoring.

Weighted Cost Score = (price of lowest cost proposal/price of each higher priced cost proposal) X (points assigned to pricing)

CPCM (Table 1 Cell C8)	Monthly Average Active Households	# of Months	Estimated Annual Cost (Average CPCM x Monthly Average Active Households x 12 months)
\$ -	171,269	12	\$ -

Scoring Component 2: (50 Possible Points out of 200 Total Points)

The Bidder will complete the information requested for Table 4 as designated on the tabs within this workbook. This Tab will be used to generate the calculations used for scoring criteria as described in Section 9.3 using Table 4 Cell F17.

Weighted Cost Score = (price of lowest cost proposal/price of each higher priced cost proposal) X (points assigned to pricing)

Appendix E.1 EBT Cost Proposal Form

Bidders shall use the following EBT cost proposal form. The EBT Solution shall be all inclusive of activities related to satisfy requirements described in RFP Section 5 General Scope of Work, RFP Section 6 EBT Scope of Work and all supporting requirements Appendix A and Appendix B of the RFP. Costs shall include all work performed during transition periods before contract start date and after contract end date, and maintenance as specified by the RFP.

Bidders shall provide cost for EBT solution and services for the Contract. Table 1 is for future Contract management information only and will not be scored as a whole. The CPCM provided for the Active Household range 170,001-200,000 will be used to calculate the Estimated Annual Cost on Tab 1 that will be used for the Cost Proposal evaluation criteria described in Section 9.3.

Table 2: Value Added Services

Bidders shall describe any innovation or efficiencies provided by its solution, including its advance data warehouse offering with the technical proposal. Bidders shall use Table 2 to indicate the following pricing options: any pricing impact these items will have on the bidder's CPCM provided in Table 1, how much the service would cost if paid for upfront, and a monthly cost option that would extend for the lifetime of the Contract.

Table 2 is for future Contract management information only and will not be scored.

Appendix E.2EPC Fee Chart

Bidders shall propose an EPC Solution at no cost to the Agency. The EPC Solution shall adhere to the RFP Section 7 EPC Scope of Work and requirements, and include all work performed during transition periods before contract start date and after contract end date, and maintenance as specified by the RFP.

Table 3 is for future Contract management information only and will not be scored.

Appendix E.3 Wireless EBT Project Cost Proposal Form

Bidders shall use the following Wireless EBT Project cost proposal form. The Wireless EBT Project Solution shall be all inclusive of activities related to satisfy requirements described in RFP Section 8 Wireless EBT Project scope of work and all supporting requirements Appendix D of the RFP. Costs shall include all work performed during transition periods before contract start date and after contract start date, and maintenance as specified by the RFP.

The average farmers market season runs April through October. Historically, this is when the majority of the work load occurs. However, there are some farmers that operate year-round and will require support throughout the year.

Bidders shall provide cost for Wireless EBT Project solution and services for the Contract. Total Estimated Annual Costs calculated in Table 4 (Cell F17) will be used for the Cost Proposal evaluation criteria described in Section 9.3.
