1.3 PROJECT DESCRIPTION

Construction Manager (Story Construction) has been engaged for this Project to serve as advisor to DAS and to provide assistance in administrating the Contract for Design between DAS and the Designer according to separate contract between DAS and Construction Manager. DAS is currently seeking design services from qualified firms for a project consisting of a study to determine what is needed to install air conditioning for the Gymnasium at the School. Full design, bidding and construction administration services for the addition of air conditioning will be negotiated with the successful firm once the study identifies the scope of work needed to add air conditioning to the gymnasium.

Design services shall include:

- 1.3.1** The contract for this work will be a modified ConsensusDoc 803. See link on cover page for a sample contract.
- 1.3.2** All design disciplines necessary to complete the scope of work.
- 1.3.3** Attend design kick-off meeting onsite to discuss desired outcome of the project with the Owner, Construction Manager, and Owner's maintenance staff.
- 1.3.4** Use of the State of Iowa's construction management software program for uploading all documents, submitting and approving pay apps, and construction administration. The cost for the use of the software is paid by the Owner.
- 1.3.5** The study should include an overall assessment of the existing equipment and what would be needed to provide air conditioning to the gymnasium, along with a construction estimate. The study will be the equivalent of the design development phase so the project would be ready to move into construction drawings if it proceeds.

1.3.5.1 Exhibit A includes pictures of the existing air handler #4 that serves the gym and the chiller that serves the School building. It is believed AHU#4 and the chilled water system were designed to accommodate the future addition of chilled water coils for the gym. This project does not anticipate replacing the chiller or the air handler, but the study will need to confirm they are both sized appropriately and review all other ancillary equipment.

1.3.5.2 Exhibit B includes excerpts from the construction drawings for the gym.

- 1.3.6** Existing CAD/PDF drawings will be provided to the successful design firm. Accuracy of drawings shall be verified by the design firm.
- 1.3.7** Field examination of the existing buildings.
- 1.3.8** Design for scope of work. Provide material recommendations based on experience, quality, and price. Recommendations for replacements and upgrades shall include non-proprietary equipment and systems.
- 1.3.9** Designer shall include any and all survey work required for completion of project.
- 1.3.10** Coordinate with State agencies to confirm utilities that may be abandoned as well as shut down requirements where required.
- 1.3.11** Provide detailed input of design schedule to Construction Manager for overall incorporation into master schedule.
- 1.3.12** Designer shall assist Construction Manager in the evaluation of long lead times.
- 1.3.13** Quality control during Design, Preconstruction and Construction.
- 1.3.14** Compliance with all Federal, State, and applicable Local codes.
- 1.3.15** Completion of State building and energy code documents, as required.
- 1.3.16** Design review will be conducted virtually at 50% study progress check-in and final study with cost opinion. Review will be conducted with DAS Owner Representative, Construction Manager, and Facility Representative, at a minimum. Study documents and cost opinions shall be provided at least five days prior to each review meeting.
- 1.3.17** Develop and distribute agendas and meeting minutes for all meetings during the design phase.
- 1.3.18** Designer shall provide any information necessary to obtain utility rebates where applicable.
- 1.3.19** Construction cost opinions provided by the Design Professional team with the completion of the Study.
- 1.3.20** Acknowledgement that all documents are copyright to the State of Iowa and shall be turned over to the State of Iowa in their native computer format. Any ASIs/RFIs/PRs and addendums will be expected to be incorporated before final posting. Both the native computer format and PDF versions shall be uploaded to the construction management software program at the end of the project.
- 1.3.21** The Department of Administrative Services reserves the right to negotiate with the successful firm for future design, bidding, and construction administration services related to gym air conditioning.

1.3.22 The Department requests lump sum pricing from the respondents to this RFP, with the lump sum base scope price being inclusive of all reimbursables, such as printing, mileage and travel expenses.
