## Description

---

The purpose of this Request for Bids (RFB) is to solicit bids from qualified providers to provide the EVS Video Service/Replay System described further in this RFB to the Lead Agency and any Participating Agencies. The Lead Agency intends to award a contract(s) beginning and ending on the dates listed in the solicitation, and the Lead Agency may extend the contract(s) for up to the number of annual extensions identified in the solicitation at the sole discretion of the Lead Agency. Any contract(s) resulting from the RFB shall not be an exclusive contract.

This RFB is designed to provide Bidders with the information necessary for the preparation of competitive Bids. The RFB process is for the Lead Agency's and Participating Agencies' benefit and is intended to provide the Lead Agency with competitive information to assist in the selection process. It is not intended to be comprehensive. Each Bidder is responsible for determining all factors necessary for the submission of a comprehensive Bid.

**It is advised to "Save Progress" often and especially after uploading documents.**

**NOTE: Anytime the Bidder opens their bid after the initial submission, they MUST certify and resubmit. No information will be lost from the initial submission.**

**NOTE: Bidder must approve and resubmit their bid after an amendment has been posted by the Issuing Officer. If the bid was submitted before the amendment, all information will be saved. The Bidder only needs to read and acknowledge the amendment.**

**Instructions for Amendments:** Answer the newly posted question in the Questions Section, and CERTIFY and SUBMIT your bid again (if previously submitted).

### Contract Term

This would be a PO award that would include the indicated hardware, onsite commissioning, training, and the first year of support.

Iowa PBS justification for replacing the 2008 equipment is as follows:

The space available for the two pieces of hardware that maup the system must match the existing units, as additional space is not available. The available space is is 8U (8 rack units). The new replacement hardware units from EVS are only 6U or 2U.

Connectivity, inputs and outputs must match the exsisting units to match the number and type of connections currently available in the mobile production unit truck. There is no physical room to add more or change the types of cabling and connectors.

There is no more capacity within the other connected systems to handle different or more inputs and outputs from a device of this type of equipment.

The video system in the mobile unit can only understand NTSC 1080i video standards which the requested system is designed to conform to.
