Regarding RFQ# 24CRDWBPPAYT-0014

At the time of posting the RFQ for Nishnabotna Aerial spraying, the scope of work stated that we were requesting 5 gallons of solution per acre to be sprayed. Upon further consideration, after inquiry from multiple contractors, we've determined that 3 gallons of solution per acre will be allowable. The RFQ has since been changed to reflect this amount. The issuing officer will get clarify with each bidder that they understand this change at the time of receiving the bid.

Sincerely,

A handwritten signature in blue ink, appearing to read 'P. Payton', is written over the word 'Sincerely,'. The signature is fluid and cursive.
