We are pleased to provide the following cost proposal for your review.

Hourly rates will be applied against estimates of time to conduct Retro-Commissioning Services based on the information provided by State agencies.

Equipment costs are not applicable on the basis that SystemWorks has a sufficient amount of equipment necessary for measurement of equipment performance and verification of identified system updates. For larger facilities, it is assumed that a Building Automation System (BAS) is present and has historical trend data capabilities. SystemWorks' personnel will adjust their approach as needed depending on BAS server storage capacity in order to ensure that accurate information is provided to the State Agency for which services are being provided.

Travel costs will be included on projects outside of a 60-mile radius from Des Moines and Davenport city center, based on the location of SystemWorks' staff.

Overnight costs will be included on projects where it is more cost effective for SystemWorks' employees stay overnight, instead of travelling each day. Exact expenses will be tracked and submitted for reimbursement at the State rate.
