To Whom It May Concern,

Please accept this letter of support as insight into our work with BootUp. We are delighted to write about our collaborative work with and utmost support for the BootUp team.

BootUp PD is a 501(c)(3) nonprofit organization that partners with districts to implement district-wide elementary computer science initiatives. For the past few years, we've worked closely with BootUp to customize and roll-out our elementary coding initiative across our district. Juab educators have participated in over 75 hours of computer science professional development and coaching in order to provide regular computer science instruction to every 4th and 5th grader. It is with the support and guidance of BootUp that we have achieved this goal.

The experience we have had with BootUp has been impeccable. We were interested in finding a partner that could empower our teachers to provide computational thinking instruction to our students. This is no small task. The structure, intentionality, and general demeanor of the BootUp team has made this a productive partnership. The professional learning environment they provided was top-notch, and the curriculum resources are thorough and well-curated.

While our formal partnership has ended, the computer science learning in our district continues to progress. This is a credit to BootUp; BootUp PD is committed to supporting teachers and districts in a sustainable way.

Sincerely,

Krystle Bassett
