	ORDERING AND PRICING GUIDELINES An order is defined as a single purchase order shipping to a single destination.
	All pricing is predicated on factory sourced orders - retail and on line purchases are not eligible for these special discount rates.
	Actual manufacturer-imposed surcharges and/or fees may be applied to product pricing and/or final quoted pricing.
-	nined by the total list price of all product offered within a single brand. The aggregate total determines the pricing tier, and as applicable - the correspondin i for product categories for that single brand. The aggregate order total reflecting a combination of brands is not applicable when determining volume tiers.
**Brands may be combined	on a single purchase order to streamline the order process and eliminate the need to generate multiple purchase orders but tiered pricing is based on the list price per BRAND. **Full line catalogs, cut sheets, specification, color & finish cards are available on request.
	** Discounts are applied to the current list price in effect at time of order.
