Request for Bid  
for  
Physician Assistant (PA) or Nurse Practitioner (NP)  
to Provide Medical and Psychiatric On-Duty and On-Call Services  
SOPSCHK26001

Question 1: One thing I was curious about is as a psychiatric mental health nurse practitioner we are only certified for psychiatric care so if a patient is there and has any medical concerns are we just sending them to the ER for evaluation and treatment or is there going to be another on-call provider that can handle medical issues that arise?

Answer 1: Cherokee Mental Health Institute has a medical doctor on contract whom is available to consult with for minor medical issues that may arise. Major medical issues are sent to the emergency room for evaluation and treatment.
