TO: Prospective Bidders

Subject: **Clarification Notice**
Sio963414A Wetland Project – Bid No. 25-05
Sioux County, Iowa

A contractor raised a question about how a road use agreement with Sioux County and/or the Iowa Department of Transportation would be handled for this for this project. The current plans and specifications assumed that no special road use permit would be required. It is not possible at this time to know with certainty what will be required or the cost. IDALS-DSCWQ will issue a change order to cover this cost as needed. The contractor is still responsible to establish temporary access, provide signage as required, and obtain other permits as stated in the plans and specifications as part of their costs for Bid *Item 3*.

Sincerely,

A handwritten signature in black ink that reads "Michael L. Bourland".

Michael L. Bourland, P.E.
