RE: **Addendum # 1** to RFP0218335034, Environmental Consulting for GRC, proposals due 3/06/18 by 2:00pm

The following additions, changes, and clarifications are hereby made by Addendum #1.

1. **Question:** Under the Tier 1 Site Investigation, #5 & #6, as far as I know there are no DNR rules stating you must collect monthly soil and groundwater samples. Is this accurate? Or maybe a requirement specific to their site? Or is it a typo?

**Response:** You can re-classify the services mentioned in #5 and #6 as services you need to be able to provide on an as needed basis. In the past these services were required for an extensive period of time due to certain events that occurred at GRC. GRC was cleared of those sampling requirements last year but we want you to include information (those services and potential fees) in case an unexpected event could again require those services.

Please acknowledge addendums in your proposal.
