

RFP 11125 – Auscultation Manikins

Question1: *Please clarify the quantity of each manikin type you would like. The requirements state 4 total manikins but also references various options:*

2.5.1 Pediatric, adult, and various race/culture representations.

Response: Depending on vendor options:

- Skin tones dark or medium, if not available then light.
- 4 adults. If pediatric options available- 3 adults and 1 peds.

Question2:

2.5.11 Integrate with existing and future IT infrastructure as outlined by DMU. - Can you clarify what this means? What existing and future IT infrastructure should we be compatible with?

Response: If product accesses the internet, needs to meet ITS safety and security standards.

Question3: *Do you have a brand or model you're currently using that is compatible with this software? Do you have a brand or model in mind?*

Response: DMU has utilized several auscultation trainers, including Harvey, SAM, and simscopes. This RFP is open to all new and established portable systems, that can be transported to classroom spaces for student practice.

Question 4: *Auscultation manikins do not require any installation or training. Can you expand on this more?*

Response: If installation and training is required, please note that in the RFP.
