Addendum #1 for RFP 0919335103

Wallace Building Auditorium Remodel

- 1) Q: Are the restroom and auditorium projects going to be awarded separately? Is there a particular reason the projects are separate?**

A: Yes, the projects will be awarded separately, mainly due to construction schedules.

- 2) Q: Are floor plans available for each? Also, what format are they available in? Autocad? Revit? PDF?**

A: We have very basic Autocad drawings, but any information in those would need to be verified by the design firm. We also have PDF drawings of the Mech, Elec, HVAC and Architectural drawings.

- 3) Q: What is the budget for each? The final budget is undetermined at this time.**

A: That will be determined once a schematic design is complete.

- 4) Q: What will the auditorium be used for? Anything more than a simple presentation that would require specialty AV equipment and lighting controls?**

A: The auditorium will be used for general use. The equipment and lighting controls will be determined during design.

- 5) Q: Will the podium be replaced as part of the project?**

A: This will depend on the final design and budget.
