Brake Pad Line

All PFC CarbonMetallic® Brake Pads use the following Multi-Layer Technology™:

- Exclusive **Multi-Layer Technology™** isolates, dampens, and eliminates noise.
- Vehicle specific formulation for exceptional stopping power over a longer performance life.
- Patented **IONIC FUSION™** friction bonding technology for the strongest bond to the backing plate.
- Statistically controlled quality steel plates ensure proper fit with every pad.
- Patented Powder Coating prevents corrosion and extends caliper life.
- NO Asbestos, NO Lead, NO Cadmium, NO Chromium, NO Potassium Titanate, NO Fillers - Environmentally Friendly.
- Meets or **EXCEEDS** OE and FMVSS Safety Standards.

CarbonMetallic® It's Quieter, Stops Quicker, and Lasts Longer.™

DENOTED WITH A .20 OR .21 (EXAMPLE: 0502.20)

State of the art brake friction technology that outperforms "ceramic" and traditional semi-metallic pads in all categories verified by independent lab results. The secret is... At PFC Brakes we don't just meet OE standards, we exceed them. Denoted with an ending part number of **.20** example: **0786.20**

CarbonMetallic® vehicle-specific formulated friction material for maximum performance

DENOTED WITH A .10 OR .11 (EXAMPLE: 0502.10)

Truck and Fleet specific CarbonMetallic® formulation offers upgraded durability, increased longevity, and quieter operation for fleet, towing, and medium duty applications. Lower cost per mile. **NO COMPROMISES™**

Sportscar- From the track to the street, our sportscar specific CarbonMetallic® formulation offers more stopping power and increased fade resistance for the high performance driver that demands the most from their BMW, Porsche, Mustang, Corvette or Import. Denoted with an ending part number of **.10** example: **0786.10**

CarbonMetallic® PFC Anti-Corrosion Technology (select medium duty part #'s)

DENOTED WITH A .12 OR .13 (EXAMPLE: 0786.12 or 0786.13)

PFC's **Anti-Corrosion Technology** unlike any of the competitors. PFC's quality, high-temperature strength technology prevents rust, peeling, and corrosion for strong protection on all surfaces of the brake pad. Denoted with an ending part number of **.12 or .13** example: **0786.12** or **0786.13**.

Brake Rotor Line

All PFC ZERO FAILURES® Brake rotors adhere to the following specifications:

- High Carbon Alloy with copper and molybdenum for high temperature strength and durability.
- Vanes turned OD and ID for balance to reduce thermal warping and vibration.
- Thickness variation less than .0003 inches and Run out less than .001 inches reduces Pulsation and Vibration.
- 47 or more vanes for superior thermal capacity.
- Aircraft quality heat treatment for micro structure alignment and durability.
- Surface finish less than .7 microns.
- 100% measured and inspected to meet strict tolerance specifications.

One-Piece (smooth surface). The highest quality direct replacement rotor on the market, our one-piece rotors are exceptionally popular with fleet and police vehicles for unrivaled durability, thermal stability, and Lowest Cost Per Mile. **NO COMPROMISES™**

PROUDLY MADE IN THE USA
