Logging Devices, Electronic (Long-Range Data Collection and VFC400-SP

When the 400-SP Smart Probe calibration period ends, simply replace it with a new smart interchangeable probe (calibration certificate included). No more downtime or disruption to your data logging process. No more configuring backup loggers. The VFC400-SP data logger measures and stores up to 15,900 temperature readings over a -40C to +99C (-40F to +210F) measurement range from a Smart External Probe. The display is designed to show at a glance if temperature excursions have occurred.
