Background information:

Purpose

The Iowa Department of Administrative Services on behalf of the Iowa Department of Corrections (DOC) is seeking eligible Bidders to provide **Diagnostic Telemedicine Services/EKG Readings** for incarcerated individuals in all nine DOC facilities based on physician's order.

Background

Electrocardiography is the process of producing an electrocardiogram, a recording of the heart's electrical activity through repeated cardiac cycles. An electrogram of the heart which is a graph of voltage versus time of the electrical activity of the heart using electrodes placed on the skin

An electrocardiogram (EKG/ECG) quick test to check the heartbeat. It records the electrical signals in the heart to show how fast the heart is beating, the rhythm of the heart beats and timing of the electrical impulses as they move through the different parts of the heart. Test results can help diagnose heart attacks and irregular heartbeats, called arrhythmias or ischemia, which occurs due to a block in an artery of the heart, reducing blood flow to the organ.
