525D - 25 Ft. Draper Cutting Platform
Equipment for Base Machine

CUTTERBAR:

The SCH Easy Cut Cutting System provides smooth, superior cutting. Spring steel guards with cutting edges on top and bottom, along with alternating and bolted heat-treated sections, eliminate the need for hold downs. The system keeps dirt and debris from accumulating under the knives for increased performance in severe cutting conditions.

HAY GUARDS:

Hay guard ensures a smooth transition from knife to draper and reduces material wrapping on the rollers.

POLYESTER DRAPERS

42" (106.7 cm) drapers are made of long-lasting, rubberized polyester with fibreglass reinforced slats and are V-guided to eliminate manual draper tracking

DRAPER DRIVE

The 3" (7.6 cm) diameter drive rollers provide traction in heavy crop conditions. Powered from the inside by a hydraulic motor, the drapers move the crop towards the centre for more uniform feeding

REEL DRIVE

The hydraulically driven reel is easily controlled using standard in-cab controls. In-cab controls allow for quick reel adjustment in changing crop conditions.

KNIFE DRIVE

The knife is driven by a 3 5/16" (8.4 cm) stroke epicyclic knife drive which operates at 1,440

strokes per minute. The knife drive is driven by a low-maintenance hydraulic drive motor. Double knife drive systems are standard equipment on 25', 30' and 36' models.

DOUBLE SWATH

Using two shifting decks, double swath gives you in-cab control for right, left and centre delivery of your windrow. Double swath is optional on 25', 30' and 36' models.

SWATH OPENING

Standard swath opening is 81" +/- 3". Double swath standard opening of 46" +/- 6". Standard swath opening may be decreased by 14" or 28" on some models.

ADJUSTABLE CASTORING GAUGE WHEEL

Vertically adjustable and cushioned with a spring for compression and rebound, castoring gauge wheels are available as standard equipment on 30' and 36' swather tables. N/A on 25'. The castoring design eliminates gouging when turning.

INTEGRAL STORAGE TRANSPORT

The self-contained transport, including hitch, jack and axle, is conveniently stored on the swather table.
