REAR HITCH, COUPLER AND STABILIZER

Advertised Hitch lift capacity is the amount of force that is sustained through the entire range of lift, measured at 610 mm behind the hitch point. This is measured with the rear hitch center-link connected to the upper hole. See Operator's Manual for more information.

Maximum lift capacity is noted as well. This is the maximum force achieved during lift, directly at the hitch point.

REAR HITCH, COUPLER AND STABILIZER

Advertised Hitch lift capacity is the amount of force that is sustained through the entire range of lift, measured at 610 mm behind the hitch point. This is measured with the rear hitch center-link connected to the upper hole. See Operator's Manual for more information.

Maximum lift capacity is noted as well. This is the maximum force achieved during lift, directly at the hitch point.

CommandCenter AutoTrac Activations are one time non-transferrable and only function with Generation 4 CommandCenter displays. The CommandCenter AutoTrac Activations will be activated at the factory.

GreenStar 3 (GS3) activations only function with GS3 displays. Dealer or distributor is required to activate GS3 AutoTrac and iTEC Pro Activations, referencing the tractor order number.

Accuracy is dependent on the receiver signal level. Generation 4 CommandCenter AutoTrac, AutoTrac - GreenStar 3 (GS3), and AutoTrac - GS3 with iTEC Pro Activations are compatible with StarFire 1 (SF1), StarFire 2 (SF2), or Real-Time Kinetic (RTK).

Field installed activations are available through the AMS prices pages. Warranty on all activations will be handled by AMS and will carry normal AMS warranty terms. Option availability limited by specific geographical regions. Please refer to region specific price pages for appropriate ordering codes.
